Professional Summary

AI & Cloud Engineer with 4+ years of experience delivering AI-powered solutions, automation frameworks, and RAG-based applications across enterprise environments. Skilled in requirements gathering, business analysis, and collaborating with onsite/offshore stakeholders to design, develop, deploy, and support AI/ML and cloud-based solutions. Experienced across the full SDLC including design, coding, testing, deployment, defect resolution, and production hypercare. Adept at re-engineering operations, improving delivery processes, driving innovation, and contributing to client success. Winner of a 2025 enterprise innovation hackathon for developing an Agentic AI system aligned with real-world business use cases.

Core Skills

- **AI & Cloud Engineering:** Azure OpenAI, RAG Pipelines, Agentic AI, Azure AI Search, Content Understanding, Azure Document Intelligence, Azure App Services, Cloud-native AI Solutions
- **Consulting & Delivery:** Requirements Gathering, Client Engagement, Business Analysis, Sprint Planning, Effort Estimation, Agile (Scrum), Software Development Lifecycle (SDLC), Defect Resolution, Process Optimization
- **Software Engineering:** Python, Java, C#, C++, .NET, JavaScript, API Development, Automation Engineering, Code Reviews, Documentation
- **Data Engineering:** Azure Data Factory, Databricks, SQL, Data Integration, Data Processing, ETL Pipelines, Analytics-Driven Engineering
- **DevOps & Operations:** CI/CD (Azure DevOps), Git, Operational Excellence, Production Hypercare, Monitoring, RCA, Cloud Deployment, Platform Reliability
- **Collaboration & Leadership:** Knowledge Sharing, Mentoring Junior Engineers, Cross-functional Coordination, Stakeholder Communication, Innovation Delivery

Experience

Software Engineer

Nov 2024 – Present

Orion Innovation

Chennai, TN

- Led engineering and consulting activities for a configuration-driven RAG-based AI platform using Azure AI Search, Document Intelligence, and Content Understanding, transforming client support workflows.
- Gathered functional and technical requirements from stakeholders and translated them into scalable, production-ready AI engineering solutions aligned with business objectives.
- Delivered features across the full SDLC—architecture design, coding, testing, deployment, defect fixes, and production hypercare—ensuring high-quality deliverables within defined timelines.
- Actively participated in Agile ceremonies including sprint planning, effort estimation, retrospectives, and daily stand-ups to ensure alignment with delivery expectations.
- Performed RCA, defect triage, and operational analysis to drive continuous improvement and enhance platform reliability.
- Mentored junior team members and collaborated with onsite/offshore engineering teams to ensure consistent delivery and knowledge transfer.

Software Engineer

Jun 2022 – Nov 2024

Elastacloud

Bangalore, KA

- Designed and delivered AI/ML and data engineering solutions across the SDLC, including requirement gathering, design, development, testing, deployment, and operational monitoring.
- Collaborated closely with global stakeholders to align business and technical requirements, ensuring solutions met client success criteria and project quality standards.
- Implemented CI/CD pipelines improving deployment timelines by 30% and supported Agile events such as sprint planning, grooming, demos, and retrospectives.

- Enhanced platform performance and reduced downtime by 35% by identifying improvement areas and re-engineering operational workflows.

Junior Software Engineer

Jun 2021 – Jun 2022

Elastacloud

Bangalore, KA

- Supported software engineering delivery by developing features, performing defect analysis, and contributing to process improvements increasing engineering efficiency by 20%.
- Optimized backend performance by reducing SQL query latency and supporting sprint-based Agile execution.
- Prepared documentation and contributed to knowledge sharing across teams.

Junior Software Engineer

Mar 2021 – Jun 2021

Sopra Steria

Chennai, TN

- Contributed to SAP workflow optimization and enterprise process re-engineering for banking clients, improving operational performance.
- Assisted in requirement analysis, automation implementation, and stakeholder communication.

Projects

Hackathon Winner – Agentic AI System for Smart Incident Management

2025

- Architected and developed an Agentic AI solution that autonomously detects, analyzes, and resolves incidents using multi-agent workflows, context-driven reasoning, and AI-assisted decision-making.
- Delivered a complete working solution under innovation timelines, demonstrating strong SDLC execution, stakeholder alignment, and consulting mindset.
- Showcased measurable impact by improving operational efficiency, accuracy, and client service experience.

Service Transformation – Innovation Automation Initiatives

2024 – Present

- Identified automation opportunities, partnered with stakeholders to gather requirements, and delivered scalable end-to-end engineering solutions enhancing business processes.
- Re-engineered multiple manual workflows to improve operational efficiency and align with organizational transformation goals.
- **ServiceNow Ticket Assigner Tool:** Automated ticket routing using Azure Functions to optimize assignment logic, reduce delays, and improve SLA performance.
- **Knowledge Extraction & Migration Tool:** Engineered a modernized knowledge ingestion and indexing framework using SharePoint, Blob Storage, and Azure AI Search to accelerate information discovery.
- **Ticket Sentiment Analysis Tool:** Built an NLP-based sentiment engine analyzing ServiceNow work notes to detect user dissatisfaction early and enhance client engagement outcomes.
- **Certificate Automation Tools:** Delivered automation for certificate comparison, expiry alerts, and Azure App Registration secret validation to strengthen reliability and compliance.

Certifications

- Azure AI Engineer Associate
- Azure AI Fundamentals
- Azure Security Engineer Associate
- Databricks Certified Data Engineer Associate (V2)
- Prompt Engineering Certification

Education

Bachelor of Engineering – Computer Science & Engineering

2016 – 2020

Sri Eshwar College of Engineering, Anna University

India
